

Coastal Resource Management Workshop Preparation

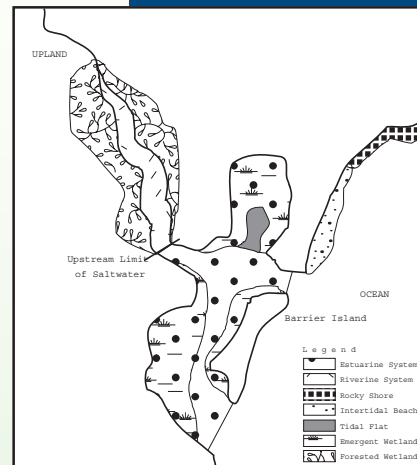

US EPA Office of Wetlands Oceans and Watersheds

Horsley Witten Group was retained by the Office of Wetlands, Oceans, and Watersheds to prepare materials for a series of workshops on protection and management of coastal resources, including estuaries, wetlands, and near coastal waters. The workshops were designed to provide support to local governments involved in management of growth-related water quality impacts. Over 50 workshops have been completed to date in more than 32 states across the country.

Horsley Witten Group prepared a workshop agenda, curriculum, and workbook. The workbook provides technical information on ground and surface water hydrology; coastal resource contaminant threats, sources, and transport pathways; assessment techniques; regulatory and non-regulatory protection tools; financing; and implementation and enforcement strategies. The workshop agenda calls for case study presentations and a participatory simulation exercise designed to reinforce topics discussed during the two-day event.
