

Massachusetts Contingency Plan Response Actions at Anniversary Park

Yarmouth, Massachusetts

Horsley Witten Group (HW) is conducting Massachusetts Contingency Plan (MCP) response actions for a gasoline release within a public park developed at a former gasoline service station on behalf of the Town of Yarmouth, Massachusetts. Response actions completed to date by HW have included:

- Completion of a Phase I Initial Site Investigation and Tier Classification;
- Development of Immediate Response Action (IRA) Plans, including design of an Air Sparging and Soil Vapor Extraction Treatment System;
- Preparation of a detailed bid package for the Town of Yarmouth for construction of the IRA system;
- Oversight of system construction;
- Remedial system operation, monitoring and compliance reporting; and
- Completion of a Phase II Comprehensive Site Assessment, a Phase III Remedial Action Plan, a Phase IV Remedial Implementation Plan, and Phase V Operational Status Reports.

HW designed the IRA remedial system and developed an environmental monitoring plan to evaluate system performance. All work, construction and installation was completed with minimal disruption to the park.

As part of the ongoing comprehensive response actions, HW designed and implemented a groundwater sampling schedule. HW staff collects all groundwater samples in accordance with Mass DEP sampling protocols. Samples are transferred under a Chain of Custody for laboratory analysis. HW then compares lab results to applicable DEP standards to track the remedial system performance.
