

Barnstable Municipal Airport Terminal Improvement Project Environmental and Engineering Consulting Services

Barnstable Municipal Airport

The Horsley Witten Group, Inc. (HW) was contracted by the Barnstable Municipal Airport Commission to complete environmental engineering, permitting, and civil and stormwater design for the construction of the new main terminal and associated roadways and parking facilities. This \$20 million project includes: assessment of existing facilities; permitting and construction of the new terminal and one-mile entrance road, involving a number of property acquisitions; replacement of the existing entry off the Airport Rotary; design of several new parking facilities; a major upgrade of the existing stormwater system; and improvements to the fuel farm, as well as general oil and hazardous materials storage and handling.

HW assisted with the completion of an Environmental Impact Report (EIR) through MEPA, and was the lead consultant for the preparation and presentation of the Cape Cod Commission's Development of Regional Impact (DRI) process, and Town of Barnstable local board review. The DRI was approved and the project is ready to break ground.

"This has been a very challenging project from the start. We could not have gotten this far without the technical support and guidance of our consultant team. We couldn't be happier with the results." - Airport Manager Roland "Bud" Breault

HW is evaluating environmental conditions relative to oil and/or hazardous materials and has undertaken Remedial Assessment and Comprehensive Response Actions at the Airport. The access road and parking locations include the acquisition and successful remediation and redevelopment of a brownfield property. HW completed an initial environmental assessment and potential remedial scenarios and cost estimates to determine the cost for redevelopment of the site.

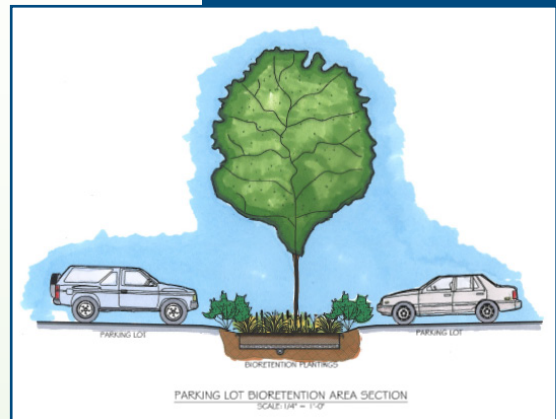

HW also completed design plans and bid specifications for public bidding and construction administration services for this Construction Manager-at-Risk Project.
