

Middle School to High School Bicycle/ Pedestrian Pathway

Town of Norwell, Massachusetts

HW was selected through a competitive bid process by the Town of Norwell Pathway Committee, working with the Planning Board, to complete the permitting, design, and construction administration of the proposed multi-modal pathway. The path is intended to provide a connection between Norwell schools via roadside and wooded areas.

HW delineated wetland and riverfront areas and presented an Abbreviated Notification of Resource Area Delineation to the Norwell Conservation Commission. Our staff completed a topographic and property line survey, and completed conceptual and detailed design drawings, based on physical and resource area opportunities and constraints. We are currently working with the Committee to finalize design and publically bid the project.
